

Determining CCI System and Version Information

This page is intended to help you determine which CCI card system you are using and guide you to the proper support.

My card readers look like this:

[LaundryCard Documentation Home](#)

Determining Version Information

LaundryCard version information can be determined by following the steps outlined [here](#).

My card readers look like one of these:

FasCard Documentation

Determining Version Information

FasCard systems are updated dynamically utilizing a central database.

Card reader specific firmware versions can be determined using the diagnostic menu by following the steps outlined [here](#).
